Education

REVA University – June 2022

B. Tech in Computer Science and Engineering

Bangalore, India

Technical Skill

Languages - JavaScript, C++, Typescript, React, Node.js, React Native, DevOps.

Cloud & Database – AWS, Azure, MySQL, PostgreSQL, MongoDB, Redis.

Others – Docker, Git, REST APIs, Nginx, Microservices, Postman, Jira, GitHub Actions, CI/CD, Microsoft Automate.

Experience

Software Engineer – RedAnt Technologies

Feb 2025 – Present

Company SharePoint Portal

Feb 2025 – June 2025

- Designed and launched the official Company SharePoint portal to gather internal tools and resources in one place.
- Integrated services such as Leave Requests, Attendance, and Announcements into a single experience.
- Adjusted branding and structure based on input from employees and HR.
- Automated news posts and approvals by using Power Automate workflows.
- Cut the time spent searching for internal resources by more than 60%.
- Set SharePoint as the homepage on all company laptops, regardless of operating system (Windows or macOS), using browser-specific scripts through Microsoft Intune for Chrome, Brave, Firefox, and Safari.

eVertio – End-to-End Process Management

March 2025 – Present

- Led full-stack development, working on both the backend (Fastify, MongoDB) and the frontend (React, Tailwind CSS).
- Built and optimized REST APIs with Fastify, which ensured high performance and scalability.
- Designed and implemented dynamic, responsive UIs using React, AntD, Tailwind CSS, following UX best practices.
- Implemented JWT authentication and role-based access control for secure user access across roles.
- Created CI/CD pipelines with Bitbucket Pipelines, allowing seamless integration and deployment.

Company Website Revamp

Feb 2025 – Feb 2025

- Migrated the static site to Next.js with static site generation, reducing the bundle size by 20%.
- Improved page speed by 23% through code splitting, lazy loading, and image optimization.
- Boosted SEO with structured metadata, improving search engine visibility.
- Created reusable, accessible UI components using React and Tailwind CSS.
- Ensured accessibility compliant with WCAG standards and full mobile responsiveness.

Internal Task Automation

Feb 2025 – Present

- Automated key HR processes using Power Automate, Microsoft Lists, IVMS, Outlook, and Teams. This significantly reduced the manual workload.
- Developed a Leave Request System with automatic approval flows and notifications. This cut HR processing time by 90%.
- Integrated Attendance Reporting with IVMS data to generate daily summaries automatically for HR and employees. This reduced the effort by 70%.
- Created an automated Birthday Notification system to boost team morale and strengthen internal culture.
- Built a Travel Request Workflow with multi-level approvals and status tracking.
- Centralized request tracking with logs and dashboards. This improved visibility and reduced unnecessary email exchanges.

L3 Software Engineer – General Aeronautics

Feb 2022 – Jan 2022

Castor – End-to-end fleet management platform

Feb 2022 – Jan 2022

- Improved page load speeds by **40%** by developing a **React**-based web application with **Ant Design**, **Tailwind CSS**, **Webpack**, **VITE**, **Redux**, **Redux Toolkit**, and enhancing UI/UX across **50+** pages.
- Lead the project with a team of **6+** members.
- Reduce the bundle size by **20%** by utilizing multiple reusable components.
- Carried out frontend **code checks** to maintain coding standards and elevate code quality.
- Attained a **15%** increase in data processing speed by developing **50+** APIs and **20+** features using **Hapi.js**, **Node.js**, and **MySQL**.
- Build an automated **WhatsApp Bot** using **Meta API**, **Camunda**, to let farmers book the slot from **WhatsApp**, leading to an increase in user engagement by **20%**.

- Facilitated communication among diverse technical squads while implementing **Scrum methodologies** for effective collaboration; identified critical integration points resulting in findings that fixed the three biggest causes of crashes during testing sessions.
- Constructed a **CI/CD** pipeline to automate the deployment.
- Crafted and executed a robust **automation system** for booking assignments via custom algorithms, achieving notable time savings while decreasing the overall workload for pilots by at least **12%**.

Pegasus – Ticket management platform

Dec 2023 – Oct 2024

- **Lead** and conduct a **code review** of the frontend with 4+ members to ensure code quality and best practices.
- Constructed a modular front-end component with **React** and **Vite**, enabling rapid deployment of new features; the project reduced development cycle time by **20%**, supporting continuous delivery goals.
- Used the **socket** to implement the **live chat** between the team.
- Created a ticking flow to track the progress of tasks, which increased the productivity of teams by **30%** and management by **24%**.

IRIS – Drone live tracking and management platform

Nov 2023 – Feb 2024

- Led the frontend project with 2+ members.
- Designed and implemented a high-performance front-end architecture with **React**, **Ant Design**, and **Redux Toolkit**; optimized code efficiency led to a **30%** decrease in debugging time for the development team.
- Collaborated with cross-functional teams through **Agile methodologies** to facilitate the integration of **20+** backend services and user interfaces, enhancing system reliability and reducing bug reports by over **28%** within three months.
- Developed a live drone tracking system using **Server-Sent Events** and **Google Maps APIs**.

Certifications

Advance React – Meta (Link)	March 2023
Front-End Web Development with React - The Hong Kong University of Science and Technology (Link)	July 2021
Microsoft Certified: Azure Fundamentals (Link)	June 2021

Open-Source Contributor

React Big Schedule – Project Owner and Developer ([Link](#))

- Maintained and enhanced the **react-big-schedule** library, which is a scheduling tool built with **React**, **Ant-Design**, **Vite**, with **90+** stars, **35+** forks, **140+** stars, and **1000+** weekly downloads.
- Coordinated with community contributors in addressing bugs, managing pull requests, and ensuring code quality.
